

Block 2: Danish Pot

Block:	Series 1, Block 2 : Danish Pot
Inspiration:	Household object - mid-century modern pot, enamelware
Design Notes:	The pot itself is enamelware with a wood handle
Sewing Notes:	<p><u>General:</u></p> <p>Numbers on this pattern <u>do not</u> denote order in which you sew pieces together.</p> <p>They are provided to give you a relative order of which pieces are on top of other pieces.</p> <p>Lower number pieces are on the bottom of higher number pieces. For example, if there is a piece with #5 on it – that piece will be placed on top of #4 (or #3, if that piece is directly behind it).</p>

	<p><u>Block Specific:</u></p> <p>Method:</p> <p>Before you start, print out this PDF, and measure the block diagram included. It will measure 6" when printed at 100% .</p> <p>Backing fabric should be cut larger than the 6.5" finish block initially so it can be cut down to exactly 6.5" once the block is complete and your appliqué can be easily centered.</p> <p>The appliqué pattern is 6.0", but you will extend pieces touching the outside (in this case, these are pieces 1 and 2) such that the block has 1/4" seam allowance.</p> <p>For this block, I used a template plastic method. Trace the shapes of the pieces on heat resistant template plastic (ie. Templar) and cut out the plastic in the exact size of the applique piece.</p> <p>Cut out fabric 1/4" larger than template fabric.</p> <p>Using some spray starch, starch the excess fabric areas and fold them up around the template fabric. Iron them down with a very hot iron with no steam.</p> <p>Remove the heat resistant plastic once the fabric is cool.</p> <p>Pin the piece down on the block where it goes, and appliqué it down using a simple appliqué stitch.</p>
